

INTRODUCTION

The EnSight online documentation consists of two main pieces:

How To Manual

The How To documentation consists of relatively short articles that describe how to perform a specific operation in EnSight, such as change the color of an object or create an isosurface. Step-by-step instructions and pictures of relevant dialogs are included. In addition, each How To article typically contains numerous hyperlinks (colored **blue**) to other related articles (and relevant sections of the User Manual).

Note that, although the entries in the How To table of contents and index are not colored blue, you can still click on an entry and jump to the appropriate document.

User Manual

The User Manual is a more traditional document providing a detailed reference for EnSight. The User Manual contains blue hyperlinks as well. Both the User Manual table of contents and index entries are hotlinked as well as cross-reference entries within chapters (which typically start with “[See Section ...](#)” or “[See How To ...](#)”).

Command Language Manual

The Command Language Reference Manual documents command language used within EnSight. This manual contains some cross-references to the How To and User Manuals, but cross-referencing from them back is extremely minimal.

Getting Started Manual

The Getting Started Manual, which contains installation instructions and a number of examples of using EnSight, is also provided on line. This manual is not cross-referenced with any of the other manuals.

WHERE TO START?

If you are new to EnSight you should read the [EnSight Overview](#) article. [Chapter 1](#) and [Chapter 5](#) in the User Manual also provide overview information. The [Introduction to Part Creation](#) provides fundamental information on EnSight's *part* concept.

ACROBAT READER

The EnSight online documentation uses the Acrobat® Reader software from Adobe Systems, Inc. Acrobat Reader provides much the same functionality as a World Wide Web browser while providing greater control over document content quality. See [How To Use the How To Manual](#) for more information on Acrobat Reader.

HOW TO PRINT THE DOCUMENTATION

Printing Topics From The Acrobat Reader

You can easily print any topic in the How To manual or any pages from the other documentation from within Acrobat. The documents have been optimized for screen manipulation, but will still produce decent hardcopy printouts. To print a topic:

1. Navigate to the topic you want to print.
2. Choose Print... from the File menu of Acrobat Reader.
3. Be sure the Printer Command setting is correct for your environment and then click OK. Your document should print to the selected (or default) printer. If you do not have a printer available on your network or you wish to save the PostScript file to disk, you can do so: click the File button, enter a filename, and click OK.

Printing EnSight Manuals

You can print (all or portions of) the EnSight manuals from provided .pdf files. These files have been print optimized and should produce reasonably high quality hardcopy. They have all been formatted for letter size paper. These files are located in the doc/Manuals directory of the EnSight installation.

You can open these manuals in Acrobat and print any or all pages, or send them to an outside source for printing.
